

Auracast

Connecting communities
to better hearing

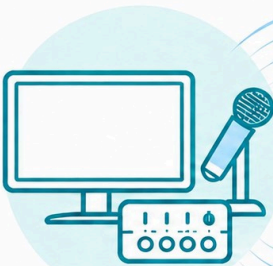

What is Auracast?

Next-generation Bluetooth technology that streams high-quality audio wirelessly to anyone with compatible Bluetooth earbuds, headphones, hearing aids, or cochlear implants.

How It Works

Venue Sound System

audio from performance,
presentation, etc.

Auracast Transmitter

broadcasts high-quality
audio wirelessly

Personal Devices

listeners connect using available
or their own compatible devices

Hearing aids

Earbuds

Headphones

Smartphone

**One broadcast. Unlimited listeners.
Easy to install. Easy to use. Easy to hear.**

Benefits for Patrons
